WHAT I DO

Hire #1 for any seed-stage AI startup. I design the brand, build the backend, and run the GTM - solo. After directing national campaigns for 10M+ monthly visitors, launching one of the fastest NFT collections of the era, and advising a \$2B AUM family office, I went full agentic: building and shipping production-grade AI products at a velocity no traditional team can match. I am now pursuing a high-impact operator role inside one team, going all-in on a single mission.
